Chinese herbalists and doctors have knowledge of over 4,000 medicinal plants and herbs.

Schisandra was first written about in between the 1st and 2nd century A.D. as a “superior herb.”

The Schisandra berry, from the plant *Schisandra chinensis*, is “the fruit with five tastes”, referring to its influence on the five visceral organs in the body.

The very name of Schisandra in Chinese, Wu Wei Zi means “Five Flavors Fruit” possessing all five of the classical “tastes” (sour, bitter, sweet, spicy and salty) and the essence of all five of the elemental energies (wood, fire, earth, metal and water).

This is why Schisandra is said to help purify the blood, support the mind, help maintain a strong memory and clinically proven to fortify mitochondrial antioxidant ability, offering the body overall protection to both internal and external organs.

A universal question millions ponder each day:

“why do I have to look so old?”

Hence, the relentless search for products and natural solutions to the visible and tangible effects of aging, wrinkles, sagging skin and internal energy dissipation.

The Schisandra berry is naturally rich in antioxidants. It not only helps fight free radical damage, but also helps to enhance the natural antioxidants system already present in the body.

Schisandra berries have been used for thousands of years throughout eastern Asia to prolong life, slow down the aging process, increase energy, for endurance athletes and by students and doctors for mind sharpening.
